RE: Wisconsin DNR Grant for Lincoln Park Streambank Stabilization,
Grant Control No. 2011-013

We are submitting a request to apply for a Wisconsin DNR Grant for Lincoln Park Streambank Stabilization. This project would consist of engineering and construction costs to stabilize approximately 750 feet of the streambank on the Root River in Lincoln Park, approximately 1,000 feet upstream of Spring Street. This area has been identified with a high erosion rating in the Root River Streambank Assessment Report.

The total amount of the project would be \$200,000.00, with 50% of the grant funding available in the amount of \$100,000.00 and a 50% local share of \$100,000.00. Funding for the local share would be made available in the 2012 Storm Water Utility Budget.
