Project Description: Perimeter Security Enhancement - 701 Grand Avenue Parking Lot

We would like to commend the Department of City Development for their ongoing and successful efforts in supporting the 'Build Up Racine' initiative, which has significantly contributed to the positive transformation of our downtown area. In the spirit of further enhancing the safety and appeal of our community, we submit this project description for consideration.

This project entails the installation of a vinyl privacy fence around the perimeter parking lot located at 701 Grand Avenue. This private office space, situated on the northwest corner of the property with existing parking accessible from both 7th Street and Grand Avenue, has experienced recurring issues with vagrancy and vandalism. The proposed fencing aims to mitigate these issues by providing a visual and physical barrier, thereby enhancing the security and maintenance of the property.

Hours of Operation: Construction activities for the fence installation are anticipated to occur between the hours of 8:00 AM and 5:00 PM daily.

Anticipated Delivery Schedule: The project is scheduled to commence on Thursday, June 5th, 2025, and is expected to be completed by Sunday, June 8th, 2025.

Maintenance Plan: The installed vinyl privacy fence is designed for low maintenance. Routine visual inspections will be conducted by property management to identify and address any potential damage or necessary repairs. Cleaning will be performed as needed to maintain its appearance. The gates will be regularly checked to ensure proper functionality.

General Use of the Building and Lot: The building at 701 Grand Avenue serves as a private office space and is not open to the general public. The surrounding parking lot provides private parking for employees and visitors of the office. The proposed fence will screen this existing parking area from public sidewalks, enhancing security without altering the fundamental use of the building or the provision of necessary parking. Two gated entrances will be incorporated into the fence design to maintain existing vehicular access points from both 7th Street and Grand Avenue. This design ensures continued functionality while addressing the security concerns and aligning with the aesthetic considerations of the Downtown Design Review Corridor.

Subject: Site and Landscape Plan - 701 Grand Avenue Security Enhancement

To ensure a comprehensive and informative submission, we have prepared a detailed site and landscape plan for the property located at 701 Grand Avenue, incorporating all relevant design and access considerations.

The existing building is situated on the northwest corner of the property. The current parking area extends around the eastern and southern sides of the building, with existing vehicular access points from both Grand Avenue and 7th Street.

The proposed security enhancement involves the installation of a new perimeter fence, depicted in red on the attached plan. The fence design is as follows:

1. **Northeastern Section:** The fence will commence at the building's northeastern corner, extending eastward along the property line for fifteen feet. A driving gate will be strategically incorporated into this section. This placement directly on the property line is intended to eliminate any concealed areas, thereby enhancing visibility and security from street view.
2. **Eastern Section:** From the north-easternmost point, the fence will continue southward, following the property line. It will terminate two feet north of the south-eastern edge of the property line. This deliberate two-foot setback on the southern side is maintained to facilitate future maintenance access for the fence and to ensure unimpeded access for neighboring properties to their driveway, accommodating any potential future repairs or replacements.
3. **Southern Section:** From its south-eastern terminus, the fence will turn westward for 49 feet, leading to the southwestern corner of the property. It will then extend northward for 25 feet. This specific placement ensures clear access to existing utilities located on the southwest corner of the building. A second driving gate will be integrated into this section of the design to maintain full vehicular accessibility.

The current visibility of the parking lot from both 7th Street and Grand Avenue has inadvertently allowed for unauthorized pedestrian traffic and created areas within the lot that are obscured from public view, contributing to instances of vagrancy and vandalism. This proposed fencing plan directly addresses these security concerns by screening the parking area while preserving necessary access.

CARE AND MAINTENANCE

Vinyl Fence Cleaning

- Most dirt can be washed off with a mild soap and water solution.
- Heavier stains can be cleaned with any non-toxic household cleaner.

How Do I Clean My Vinyl Fence?

- On occasion you may want to spray your fence with a garden hose. This will remove grass clippings, dirt and fertilizer chemicals and keep it looking as new as possible.
- To remove minor stains use a non-abrasive liquid cleaner.
- For removal of major stains follow the manufacturer's directions for one of the following cleaning agents:
 - Simple Green® All Purpose Cleaner
 - Mr. Clean® Magic Eraser
 - Mineral Spirits
 - Trichloroethylene
 - CLR (Calcium, Lime and Rust) Cleaner
 - Vinegar

**Note: Goof Off® and Goo Gone® are not recommended to remove stains.*

Maintenance Tips

To maximize the life of your fence address these areas:

- Adjust the gate every Spring — As a reminder, gate adjustments and leveling are normal care and maintenance items that the homeowner is responsible for.
- Oil the gate hinges and tighten the screws once a year.
- Do not let the gate swing in the wind. Keep it secured.
- Deter children from swinging on the gate.
- Re-tamp and realign loose posts.
