Assistant Commissioner/Engineering

RE: Proposal for Water Quality Feasibility Study for Three Facilities

We have received a proposal from Earth Tech to investigate the feasibility of retrofitting two (2) existing wet detention ponds, and converting an existing dry detention pond into a wet detention pond based on the recommends of the City's Stormwater Management Plan (SWMP). The proposal is in the not-to-exceed amount of \$16,900. Funding is available in Account No. 104.000.5330, Monitoring, Detection and Enforcement.

If the Committee agrees, the appropriate action would be to approve the proposal and authorize the Mayor and City Clerk to enter into the agreement.
