Subject: Thanks & A Request

John,

Thanks very much for promptly putting up new signs around the work being done at 18th & Wisconsin. I think they will prevent accidents and serious injury and appreciate your help.

I have a request regarding the intersection of 18th & Clark. It is a dead end intersection in my district. Woodland Alloy who is on the NE corner requested a stop sign at the SE corner of 18th and Clark because cars are coming northbound on Clark (which dead ends into 18th) and because visibility is very limited there have a number of close calls. R&B Grinding owns the property on the SW corner and my business is on the NW corner.

I do not request nor do I want any special treatment because of my business. And even from our brief meetings I know you would not treat me any differently than anyone else.

I have attached emails (below) from Woodland Alloy and R&B Grinding requesting the stop sign. Here is a picture of the intersection:
