You'll need to provide at least 4 NPAT signs with arrows designating the direction. I have no objections to the request, but this must go before Traffic Commission and Common Council for approval. No "conditional" approval can be granted at this time. Let this e-mail serve as no objection by the City Engineer.

John,

We are working on a Walmart development on the SW corner of STH 20 & STH 31. Part of our project includes offsite improvements to the intersection of STH 31 and Wright Avenue. WisDOT is requiring that we add traffic signals to this intersection, add a northbound left turn lane on STH 31 and re-stripe Wright Road to add a 100' left turn lane.

We are currently applying for a WisDOT permit to work in their right-of-way. Before obtaining a permit, we want to get concurrence from the City of Racine regarding our proposed re-striping improvements on the east leg of the intersection (City of Racine owned).

Please review the attached plan and provide comments and/or your approval of our proposed re-striping improvements on the east leg of the Wright Avenue intersection. I have also left you a voicemail. If you have any questions or concerns, please feel free to contact me. We are looking to submit our permit application on Wednesday, and we are looking to get concurrence from the City before submitting. Thank you.
