

May 2016

Subject: Direct referral.

Communication from the MIS Director to appear before the Personnel and Finance committee to request the reclassification of the Programmer II (area), PU 20 to a Programmer III PU 22.

This recommendation is being made to address the personnel changes in the MIS department requiring the functions of this staff member to take on additional duties which include Research and Development for the GIS and CityWorks applications, maintenance of the MUNIS ERP databases, and providing instruction and guidance to the other Programmer positions.

The increase will be paid for by existing funds in the MIS Salaries Budget
