Dear Tom Molbeck:

AT&T Wisconsin has tried to place 2 cabinets in road right of way at Kinzie Ave. and W 6th Street. Due to excessive existing utilities in the right of way this was not able to happen. AT&T has also tried to obtain a private easement from the Holy Communion Lutheran Church but they did not want to lose any parking spots to provide this easement. The grade changes surrounding the Church property did not allow enough flat area for the cabinet placement and subsequent easement other than existing parking spots.

AT&T would like to entertain working with the City of Racine Parks Department in securing an exclusive utility easement for a fee to place cabinets to upgrade/replace an antiquated X-Box and to place dual VRAD cabinets for U-Verse service to this area. The area which works best for AT&T is park lands on the west side of Kinzie Ave. abutting the Holy Communion Lutheran Church east property line. This parcel does have a grade change issue but could be usable with landscape timber construction for the cabinet bases.

Please see my attached sketch which shows the potential locations.

I would be happy to meet with one of your representatives to further detail this request.

Sincerely,

Tom A. Kohl
