

ALD. ARON WISNESKI
 NEIGHBORS ON 700-900 BLOCK LATHROP
 RE: LIGHTING

June 30, 2009

Manree Park is a historic area of Racine that was designed in 1929 to be a highly desirable area in which to live. There is genuine character and beauty to the area that we are very much interested in preserving. We heard about the project to replace six of the oldest lamp posts in Racine along Lathrop Ave. because some have become non-functional. Some of us have lived here for 40+ years and have continued to maintain the property value by taking pride in our homes. Some of us have recently purchased homes in Manree Park because of the high value of homes along with the unique character of the area.

We clearly understand and appreciate the fact that we need to utilize high efficiency lighting. We only ask that if they current lamp posts must be replaced that it be done so as to maintain the aesthetic value. Considering the area of Lathrop north of Washington Ave. is zoned residential, lighting should reflect a residential setting.

It is our understanding that current black "classic" poles already installed in portions of Manree Park do not use high efficiency lighting. Please consider delaying the installation of any new poles in Manree Park along Lathrop Ave. until the black "classic" poles can be installed with high efficiency lighting.

Sincerely,

	Name	Address	Willing to attend meeting
