## **RE: Transfer of Funds for Safety Building Structural Repairs**

Dear Ald. Wisneski:

We are requesting a transfer of funds to cover the costs to review and design repairs needed at the Safety Building. This year, we have been experiencing water leaking from the upper level parking lot area into the Police Parking Garage area in the lower level of the facility. We internally patched any asphalt parking areas that were causing some of this problem, but this didn't resolve all the water leakage which will require more structural analysis.

Arnold and O'Sheridan is the company that the City of Racine is currently using for structural repair design of our parking ramps and they were utilized in the past several years for structural repair design at the Central Heating Plant, so they are qualified to provide this service.

Since this issue was not anticipated last year, we didn't create an account for these services, however, we do have balance funds from another project to cover these costs and we do intend on budgeting in the 2012 Capital Improvement Program for the necessary repair work at this site. I am requesting that funding in the amount of \$3,200, to cover the cost of this project, be transferred from Account 990.410.5010, Solid Waste Garage Tuckpointing and placed in Account 990.210.5030, Safety Building – Structural Repairs.

Sincerely,

A handwritten signature in black ink that reads "Thomas M. Eeg".

Thomas M. Eeg  
Assistant Commissioner of Public Works
