Afternoon Terry,

I went out and took a look at the alley behind 1509 Deane. That alley is shot there's nothing I can do to help there if definitely needs to be reconstructed it would take us a good week of labor and 10 tons of asphalt to try and place skin patches in the alley and it would not last very long at all. The concrete is shattered in 70% of the alley so it's not potholes we can fill with MC3 patching material. My suggestion is to put it up for public hearing if it hasn't been done already. Sorry I couldn't give you better news. If there's anything else I can help please let me know..... Bill

P.S. Thanks for your support with Mr. Hooyman and the Cheska Park issue.

Bill, I just heard back from this constituent. Turns out I messed up in hearing his address. It's actually 1509 Deane. I sure appreciate your help with the 1600 block alley, but could you also take a look at 1500? Sorry - my bad!

Morning Terry,

We were working on that side of the city yesterday so we took care of the alley they should be good for a while.

Good Morning Terry,

I looked at the alley behind 1609 Deane the alley is in pretty good shape except for about 5 spots. We don't normally do this but I think it's worth it in this case I will have my hot mix asphalt crew stop there when they get a chance and patch those with hot mix and roll it. Hopefully we can save that alley for a while. Hope this helps. Bill
