To Whom It May Concern:

The Rhino Bar along with Liz Garbo are having a benefit for Project ALS. This is a research team actively researching the neurons that are primary in the diagnosis of ALS. Their primary goal is finding preventative measures for future ALS patients.

The benefit is going to be on August 22, 2015. We are requesting to have High Street blocked off between Main St. and Chatham St. It was very beneficial in the past benefits we have had set up that way.

Thank you for your consideration,

Nikki Woods/Liz Garbo
