We will introduce a preliminary resolution for public hearing. Public hearings must be held from preliminary resolutions approved by July 1 so we can program those improvements in the following year budget. This was from action taken by the Common Council in 1994.

We will program it for spring 2018 public hearing for 2019 construction if approved.

OK. In that case, please treat this as a formal communication for a public hearing for rebuilding this alley. Let's try to get it in soon still so, if approved, it can make next year's program. Thanks!

I agree and see that there are garages and parking areas in the north end of the alley, but not having a through alley would make it more difficult for vehicles to turn around in this alley other than in a garage or exposed parking area. I don't believe it would be a good idea to dead-end it either.

Regardless of solid waste or recycle pickup is picked up in the alley, I can't imagine how it would be plowed by the Parks Department or serviced by public safety vehicles needing quick access.

I would not recommend it, but I'll let the other public works personnel chime in.

I messed up that address. Just east of 2510 19th. Thanks.

Do you mean the alley between 2808 and 2820?

Gents,

The owner of 2910 19th was asking about getting this alley redone. It certainly needs it. Before we formally request that, the owner told me that it is no longer used for garbage pickup, If that's true, might we simply vacate angled south end that is only really needed for his house? Let me know what you think. I might try to get the request in still this year if needed.
