Subject: Right Turn Lane Designation @ Washinton & Ohio

John,

Pertaining to our conversation this morning;

The new software purchased with the CMAQ Interconnect Project has recommended that the north approach (SB Ohio Street) of the Washington Ave. & Ohio Street intersection be altered. The recommendation is to designate a right turn lane from Ohio to Washington; leaving one left turn lane, one through lane and a new right turn lane on the north approach. Steve and I both concur with the recommendations of the program.

Ara P. Molitor

City of Racine
Engineer II / Traffic Engineer
