

SANI-STATION® PUMP-OUT SYSTEMS

SANI-STATION®

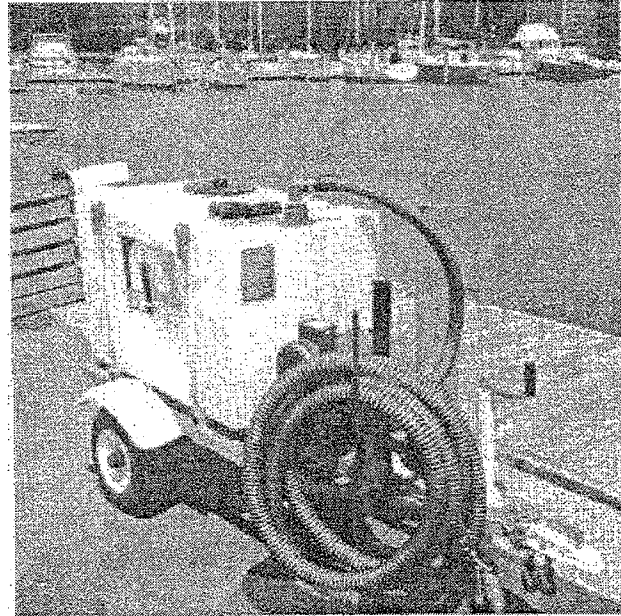

Holding Tank Service

DELUXE SANI-STATION

A complete pump-out system with all components housed in a handsome, all-weather fiberglass enclosure for stationary installation. Compact cabinet (33"W x 30"D x 33"H) houses up to 50 feet of suction hose on a built-in reel, and a 75'-3/8" built-in rinse hose system with nozzle for freshwater rinsing of holding tanks, piers and driveways. It's a perfect design for use on marine fuel docks or wherever waste transfer is required.

TRAILER MOUNTED SANI-STATION

Portable pump-out station SS-300t

A complete portable pump-out system with the same dependable pump as the deluxe model. The standard model includes a 100 gallon holding transport tank, 25' suction hose, marine fittings package and 1/2 HP 115/230 volt electric motor. Gas driven model also available.
