

## Northwind Technical Services, LLC

October 28, 2014

Mr. Tom Molbeck  
Director of Parks and Recreation  
City Hall Annex Building  
800 Center Street, Room 127  
Racine, WI 53403

Dear Mr. Molbeck:

The Racine Unified School District has requested that Midwest Fiber Networks provide a fiber optic feed to their facility occupying a portion of the building at 2405 Northwestern Avenue. Due to the pending road project and at the request of the City Engineer we are trying to avoid boring under Northwestern Avenue. The most direct route available to avoid conflict with the road project puts us on some existing WE Energies poles that end on the east side of the Wustum property at 2519 Northwestern Ave. From that pole we would need to bury the fiber southeast to the 2405 building. The existing city right of way is full with other utilities, so we are requesting permission to parallel an existing telephone conduit package on the Museum property. The attached drawing illustrates the proposal in detail.

This service was supposed to have been operational by the end of September, so we are hoping that we can resolve this access issue and complete the project quickly. If you have any questions regarding the drawing or the work being proposed you can call me at the number below.

Sincerely,

Sandra Falatyk  
President
