Dear Commissioners:

The work performed by The Wanasek Corp. (contractor) on Contract W-20-3, STH 20, CTH H and 90<sup>th</sup> Street Water Main Alterations has been completed. The contract totaled \$414,985.38, which included one change order. We recommend that the work be accepted and final payment be authorized.

Sincerely,

A handwritten signature in black ink that reads "Michael Gitter".

Michael Gitter

Re: STH 20, CTH H and 90<sup>th</sup> Street Water Main Alterations Final Application for Payment  
Project W-20-3

Dear Mr. Gitter:

Enclosed with this letter, please find the closeout Change Order No. 1 and Application for Payment No. 4 for the above-mentioned project. The intention of the closeout Change Order is to adjust the Contract Price for Work completed and to set Contract dates.

In accordance with paragraph 15.06 of the General Conditions and Section 01 78 39 of the Contract Documents, the Contractor for this Project, Wanasek Corporation, has submitted a final Application for Payment and has furnished the enclosed Contract-required items:

1. Guarantees, bonds, test reports and certificates.
2. Consent of Surety to Final Payment.
3. Certificate of continuation of coverage for claims-made and completed operations insurance.
4. Satisfactory evidence of release of all liens and claims.
5. List of Subcontractors, Suppliers, and service providers performing, furnishing, or procuring labor, services and materials on the Project.

You may want to have your legal counsel and insurance advisor review the respective lien waivers, bonding, and insurance documents to verify legal effectiveness.

In addition to the documents referenced in paragraph 15.06 of the General Conditions and Section 01 78 39 of the Contract Documents, we have asked the Contractor to submit weekly certified payrolls utilizing WisDOT's Civil Rights Compliance System (CRCS) in accordance with the Wisconsin Inclusion Plan requirements as well as submit labor/payroll data to the City of Racine Purchasing Agent for evaluation of compliance with the Racine Works Program included in the Contract Documents.

We have notified the Contractor that prior to the Racine Water Utility issuing the final payment that the weekly certified payrolls will need to be submitted to the WisDOT's CRCS and that labor/payroll data be evaluated for compliance with the Racine Works Program.

If all of the above has been completed satisfactorily, we recommend final payment, and give notice (enclosed), that the completed Work is acceptable subject to the provisions of General Conditions paragraph 15.07.

The date of Substantial Completion for this project was August 15, 2019. In accordance with paragraph 15.08 of the General Conditions, the Contractor was required to promptly repair or correct defective Work for a period of one year from the date of Substantial Completion and has since expired.

Mr. Mike Gitter, P.E.

Re: STH 20, CTH H & 90<sup>th</sup> Street Water Main Alterations Pay Request No. 4  
Project W-20-3

Dear Mr. Gitter:

Enclosed, please find the STH 20, CTH H and 90<sup>th</sup> Street Water Main Alterations Pay Request No. 4. This project includes four individual sections of work. This letter is provided to identify which entities should be paying for the different components of the Contractor's Work. There are no deficiencies identified on this project. The individual sections of work are as follows:

The STH 20 hydrant alterations and water main extension includes alterations on six existing hydrants and a water main extension on the existing 20-inch water main that was part of the existing Racine Water Utility system. Due to the WisDOT STH 20 road reconstruction project, the existing hydrants needed to be extended to behind the proposed back-of-curb and the water main extended to be out the proposed roadway for a future regional water main along the Frontage Road north of STH 20. It is anticipated that the costs for the STH 20 alterations on the existing 20-inch water main will be borne by the Racine Water Utility.

The water main relay at the intersection of CTH H and STH 11 includes relaying a section of existing 12-inch water main that was part of the existing Racine Water Utility system. Due to the WisDOT CTH H Phase 2 road reconstruction project, the existing water mains were in conflict with a proposed monotube signal pole. It is anticipated that the costs for the Water Main Relay at the Intersection of CTH H and STH 11 will be borne by the Racine Water Utility.

The CTH H water main offset includes lowering the 24-inch water main which was installed to supply water to the Foxconn development. When this water main was installed in 2018, it was installed with 10-feet of cover at the request of the Wisconsin Department of Transportation (WisDOT) so that it would not be in conflict with the proposed storm sewer installations for the reconstruction of CTH H. After the water main was installed WisDOT has proceeded with the design of the WisDOT CTH H Phase 2 road reconstruction project. A section of the 24-inch water main, north of Braun Road, needed to be offset so it is not in conflict with a proposed 36-inch storm sewer that outlets to a pond. It is anticipated that the costs for the CTH H offset on the 24-inch water main that was installed in 2018 will be borne by others.

The water main extension at the intersection of 90<sup>th</sup> Street and Braun Road includes extending the existing 12-inch water main to the south side of the intersection. The extension will serve potential future developments adjacent to Area III along 90<sup>th</sup> Street to the south and Braun Road to the east. Due to the expedited timeframe needed to complete this work and cooperating with the WisDOT Utility Accommodation requirements, the Racine Water Utility will complete this work in conjunction with the WisDOT Braun Road Phase 2 reconstruction project. This work was not able to be completed under the Braun Road Transmission Water Main project due to the right-of-way in the southeast corner of the intersection not being acquired during construction. By completing this extension during the road reconstruction project, the work will be completed while the intersection is closed to traffic and prior to the intersection being fully reconstructed. Completing the water main extension during the WisDOT

~8022-10050 HWY H and 20 Alterations > 300. Construction > Correspondence > Gitter-20220131-STH 20 CTH H and 90th Street WM Alterations Pay Request No. 4.docx~

Mr. Mike Gitter, P.E.  
 Racine Water & Wastewater Utilities  
 January 31, 2022  
 Page 2

reconstruction project will be much cheaper than waiting for the properties to request service since it is being completed when the intersection is already closed and there is no pavement restoration. It is anticipated that the costs for the 90<sup>th</sup> Street and Braun Road water main extension will be borne by others.

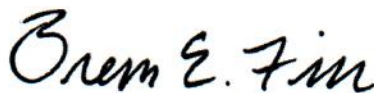

These costs are separated for your convenience. The cost breakdown is as follows:

	<b>Racine Water Utility:</b> STH 20 Hydrant Alterations and Water Main Extension on Existing 20-inch Water Main	<b>Racine Water Utility:</b> Water Main Relay at the Intersection of CTH H & STH 11 on Existing 12-inch Water Main	<b>Other:</b> CTH H Water Main Offset on 24-inch Water Main	<b>Other:</b> Water Main Extension at 90th Street & Braun Road on Existing 12-inch Water Main	Project Total
Total Payment to Date	\$161,223.50	\$74,495.79	\$93,350.50	\$85,915.59	\$414,985.38
Less Previous Payments	\$129,995.53	\$64,605.67	\$92,210.00	\$76,969.70	\$363,780.90
Payment this Period	\$31,227.97	\$9,890.12	\$1,140.50	\$8,945.89	\$51,204.48
