

March 10, 2008

Mayor Gary Becker  
and the Common Council  
City of Racine  
Racine, Wisconsin

Ladies and Gentlemen:

The Racine Wastewater Utility is in the process of completing the design of infrastructure improvements near the 3100 block of Michigan Boulevard as a result of the localized flooding experienced in 2007. These improvements will require the construction of an emergency generator in a neighborhood setting. We wish to appear before the Public Works and Services Committee to request the use of the east end of Melvin Avenue extended for the placement of this generator. We also request permission to place an underground electrical line in the public right of way on Michigan Boulevard.

Sincerely,

Keith E. Haas, P.E.  
General Manager
