5.3 Explain any infiltration/inflow (I/I) changes this year from previous years:

2021 was a very dry year. There were no overflows within the system and there were no rain events that necessitated the use of storage tanks.

5.4 What is being done to address infiltration/inflow in your collection system?

Even though 2021 was a dry year, the utility continues to evaluate and correct deficiencies within the collection system. The utility has been working with the communities that contribute flow to the system to evaluate the need for additional storage. CCTV is used to pinpoint areas that may need lining or relaying of pipe.
