

To whom it may concern,

I want to be an alderman to help my community and help clean up my neighborhood. I want to make sure neighborhoods are safe for everyone. Get something for all kids to do and something they like to do. With crime rates rising, I want to try and do something like neighborhood watch in areas that have higher crime rates than normal.

I have lived in Racine my whole life and I have never seen this city this bad. I fully believe we need to have different sensory areas for kids who are on the autism spectrum. I say this because my wife and I have two non-verbal autistic children and constantly have to go to a different city for them to play. The teenagers need something to do or hang out at that is safe for them to hopefully help get most off the streets.

Thank you,

Michael Hansen
