|  |  |  |  |  |  |  |  |  | 2.680\% |

(1) This illustration represents a mathematical calculation of potential interest cost savings (cost), assuming hypothetical rates based on current rates for municipal bonds +15 bpts as of $8 / 6 / 19$. Actual rates may vary. If actual rates are higher than those assumed, the interest cost savings would be lower. This illustration provides information and is not intended to be a recommendation, proposal or suggestion for a refinancing or otherwise to be considered as advice.
(2a) Assumes $12 / 1 / 19$ subsidy payment is received.
(3) Present value calculated using the All Inclusive Cost (AIC) of $2.24 \%$ as the discount rate.

[^0]:    Present value calculated using the All-Inclusive Cost (AIC) of $2.24 \%$ as the discount rate.
