Legistar Item: **0696-20**

Alder. Mollie Jones, Chairperson
Public Works and Services Committee
Racine, WI

Dear Alder. Jones:

During an August 2020 rainstorm, the WE Energies transformer that feeds power to Johnson Park was washed out and taken out of service. In order to prevent this situation from happening at future rainstorms, the desire is to relocate this electrical run to keep it away from the existing hill areas at Johnson Park.

This transformer relocating results in a revision to the current easement to allow them to continue to provide electric service to Johnson Park.

It is recommended that this WE Energies easement at Johnson Park, be approved.

Sincerely Yours,

Thomas M. Eeg
Assistant Commissioner of Public Works
